WE CARE *about partnerships*

Dear **Chris,**

My name is Milosz Bazela and I'm a Chief Operating Officer at Xfive.co. I'm glad to introduce our company to you.

Xfive is a solution for design and web agencies looking to expand their capacity for front-end, PHP and Ruby on Rails or WordPress development where care is the foundation of everything we do.

Xfive is a great way to handle burst periods of work by taking on entire projects, including startups. Xfive really shines when it comes to partnerships. We work as an extension to your team, bringing our quality expertise to your organization.

Please, take a moment to look through this partnership proposal.

We're looking forward to our cooperation!

WHO *we are*

For more than ten years we've been helping creatives bring their amazing ideas to life in the digital world.

We care about your creations as much as you do... and that's why our clients keep coming back.

Xfive.co Pty Ltd. is an Australian based company registered under Australian Company Number 160 801 285. Xfive was established in 2006, and at the time, it popularized the PSD to HTML conversion industry.

Since 2006, we have worked on thousands of projects ranging from individual clients to small and mid-sized companies, as well as projects with the web's biggest brands such as **Twitter, Ebay, Microsoft, Threadless, FOX** and **Rogers Media**.

Xfive currently has offices in Melbourne, Australia and Los Angeles, California as well as our main development centre in Kraków, Poland.

WHY *us*

People

With our team of **45 experienced developers** at your disposal, you can rest assured your projects will be turned around in-time and on-budget.
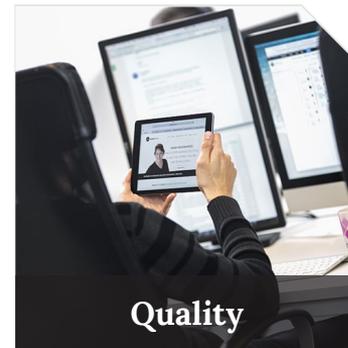

Workflow

Not only are we faster than most other agencies, but we also provide a **24 hour work flow**, so your projects are being completed while you sleep.
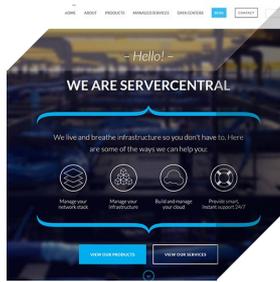

Standards

Our **code-standards** and fully **commented syntax** mean that hand-off goes smoothly and future changes and maintenance are a breeze.

Quality

You'll also get one of the **best Quality Assurance** teams in the industry and we provide all of our work with a 2-weeks guarantee.

CLIENTS *testimonials*

"Xfive did a quality job, great attention to detail. Hire them if you want your design followed to pixel level detail with clean code. Highly recommended."

– **Patrick Leddy,** Furious Tribe

"My experience has been remarkable in that the work was done fast, my myriad changes were attended to without complaint or any increase in cost, and contact was regular, concise and always friendly."

– **Derek Rielly,** BeachGrit

"Xfive saved our website after we lost our original developer at the last minute and got our site up and running again in a timely manner."

– **Alyssa Jahnke,** MeBath

"For our largest individualized campaign ever for a major car manufacturer, we used Xfive. I am very satisfied with the results and the speed. I can highly recommend them."

– **Joakim Törnqvist,** Propan

PROCESS *of engagement*

Client brief / RFQ

Responsive Digital Media

Pre-Discovery
Project producers and devs will review the brief and ask the additional questions if necessary

Rough-Estimate
Based on pre-discovery project producers will give a rough estimate on hours required

Full Discovery
If estimate is ok, producers will do a full discovery and qualify functional requirements

Fixed Quote
Based on full discovery, project producers will prepare itemised, fixed cost quote

Development
Developers will build the project based on agreed upon timeline

QA & Delivery
Project work is fully tested by QA and files are to the server of the client's choosing

Process of engagement for fixed price project work

The typical process of engagement for a fixed price development project with Xfive starts with a client brief or RFQ. This is often sent directly to our Business Development representative for quick review and discussion to help procure initial pre-discover information.

This information is given to your project producer who will review the scope of the project and produce a rough estimate. This estimate is sent directly to the client for approval, often the next day if no further pre-discover questions are required. If the rough estimate is satisfactory, the project producer will engage a senior developer and perform a full discovery process. This can take longer depending on the scope of the project but for a typical front-end job is still usually just 24 hours.

If the client would like to proceed with the project, a 50% deposit is paid upfront to engage work. Development and QA time can vary depending on the scope of the project but a typical front-end site can be as little as 3 days.

Once development work has been completed and tested by our QA team, files are uploaded to our staging server and are ready for review. If the project is satisfactory, the remainder of the balance is billed and all project files are delivered to the client.
